EasyDive Kit

The **EasyDive Kit** is a complete dive & snorkel system. Just grab and you are ready for your next dive & snorkeling adventure. No longer limited to the surface and quick underwater swims, snorkelers can take occasional deeper dives to explore the shallows, with less equipment than a full diver would require.

EasyDive Kit is perfect for any situation where you want to jump in the water quickly – particularly if you don't want to spend a lot of time setting up dive gear. Whether you need to check out the bottom of a boat or find a new reef to explore, **EasyDive** has the solution to make diving simpler and quicker.

The **EasyDive Kit** includes a 19 cu. ft. cylinder, custom Harness, Tank Valve/First Stage combo, Second Stage Regulator, Mini Pressure Gauge, Air Compressor Refill Adapter and incorporates the NEW Snorkelator.

NOMAD

The **Nomad** includes a **Spare Air** attached to the **Snorkelator**, making it the most lightweight snorkel and regulator combination available. Together they offer an experience like no other, allowing divers to get in the water to snorkel & dive within seconds.

The Spare Air has a 1.7 cubic foot tank that gives enough air to give you some bottom time when snorkeling. It's perfect when you need a little more time to get an awesome picture or check out the underside of your boat.

Quickly re-charge the Spare Air from a full SCUBA tank with the included tank adapter and be back in the water in just one minute.

Snorkelator

The **Snorkelator's** patented technology offers divers the ability to combine this snorkel with any diving regulator – creating a truly unique experience.

The Snorkelator comes with a top-of-the-line dry snorkel already attached. Simply attach to any SCUBA regulator with just a few simple steps and you are ready to go. The **Snorkelator** is perfect for those that love to snorkel and dive and would love the convenience to switch between the two easily and seamlessly. Switching from your regulator to snorkel when surfacing is not only annoying, it can also be a safety hazard.

Product Specifications:

Model	EasyDive Kit	Nomad	Snorkelator
Part Number	700-003	700-002	700-001
Weight	15.0 lbs.	2.5 lbs.	.55 lbs.
MSRP	\$525.00	\$400.00	\$80.00
Tank Size	19 cu. ft.	1.7 cu. ft.	none*
Air Supply	15-20 minutes	30 surface breaths	none*

* Snorkelator receives air from the attached SCUBA system and has no inherent air supply
